Subject Index of Volume 25

- Absorption
 - mass transfer in liquid films during, 65, 75
- Bubble columns
 - mass transfer phenomena and hydrodynamics in, at elevated pressures: state of art, 85
- Catalyst
 - V-Ti, two fixed beds of, oxidation of *o*-xylene into phthalic anhydride in reactor with, 127
- Coalescence
 - of drops in pipe flows, 15
- Desorption
 - liquid dessicant, by ambient air at low temperatures, analysis of, 1
- Diffusivity
 - of He, N₂ and C₃H₈ in aqueous ethylene glycol solutions at 25 °C, 65
 - molecular, of gases at high values of Schmidt number, dependence of liquid-side mass transfer coefficient on, 75
- Drop coalescence
 - in pipe flows, 15
- Films
 - of liquid, mass transfer in, during absorption, 65, 75
- Fluid flow
 - very low Reynolds number, through screens, 159
- Fluidized beds
 - liquid, experimental determination of interaction force on spheres in, 27
- Freeze-drying
 - vacuum, kinetics and modelling of liquid in vial, 153
- Gas-liquid reactors
 - agitated, mass transfer phenomena and hydrodynamics in, at elevated pressures: state of art, 85
- Gas pressure equalization
 - in beds of solids, modelling of, 47
- Helax
 - new type of static mixer — operation characteristics and comparison with other types, 59
- Hydrodynamics
 - and mass transfer phenomena in agitated gas-liquid reactors and bubble columns at elevated pressures: state of art, 85
- Interaction force
 - on spheres submerged in liquid fluidized beds, experimental determination of, 27
- Mass transfer
 - in liquid films during absorption, 65, 75
- Mass transfer phenomena
 - and hydrodynamics in agitated gas-liquid reactors and bubble columns at elevated pressures: state of art, 85
- Micromixing
 - in turbulent flows, influence of viscosity on, 133
- Mixed-integer programming
 - experiments in process synthesis via, 99
- Mixer
 - Helax — new type of static, — operation characteristics and comparison with other types, 59
- Osmosis plants
 - two-stage reverse, design and performance of, 119
- Oxidation
 - of *o*-xylene into phthalic anhydride in reactor with two fixed beds of V-Ti catalyst, 127
- Packed beds
 - within tubular flow apparatus, effects of organized structures of, on homogeneity of radial distribution of fluid velocity, 141
- Pipe flows
 - drop coalescence in, 15
- Porous media
 - characterization of, by means of Voronoi-Delaunay tessellation, 35
- Pressure equalization
 - of gas in beds of solids, modelling of, 47
- Process synthesis
 - experiments in, via mixed-integer programming, 99
- Programming
 - mixed-integer, experiments in process synthesis via, 99
- Screens
 - very low Reynolds number fluid flow through, 159
- Solubilities
 - of He, N₂ and C₃H₈ in aqueous ethylene glycol solutions at 25 °C, 65
- Spheres
 - submerged in liquid fluidized beds, experimental determination of interaction force on, 27
- Static mixer
 - Helax — new type of, — operation characteristics and comparison with other types, 59
- Tubular flow apparatus
 - effects of organized structures of beds packed within, on homogeneity of radial distribution of fluid velocity, 141
- Turbulent flows
 - influence of viscosity on micromixing in, 133

Velocity

fluid, effects of organized structures of beds packed within tubular flow apparatus on homogeneity of radial distribution of, 141

Viscosity

influence of, on micromixing in turbulent flows, 133
Voronoi-Delaunay tessellation
characterization of porous media by means of, 35

Mass transfer phenomena
and hydrodynamics in agitated gas-liquid reactors
and bubble columns at elevated pressures: state of
art, 85
Micromixing
in turbulent flows: influence of viscosity on, 133
Mixed integer programming
experiments in process synthesis for, 99
Mixers
Helix - new type of static, - operation characteristics and comparison with mixer types, 39
Common plants
two-stage reactor, design and performance of, 119
Oxidation
of α -xylene into phthalic anhydride in reactor with
two fixed beds of V-Ti catalyst, 127
Packed beds
within tubular flow apparatus: effects of organized
structures of, on homogeneity of radial distribution of fluid velocity, 141
Type flows
drop coalescence in, 15
Porous media
characterization of, by means of Voronoi-Delaunay
tessellation, 35
Pressure optimization
of gas in beds of solids: modeling of, 47
Process synthesis
experiments in, via mixed-integer programming, 99
Programming
mixed-integer, experiments in process synthesis for,
99
Science
very low Reynolds number fluid flow through, 139
Spherulites
of the H_2 and C_2H_4 in aqueous ethylene glycol solution at 25°C, 67
Spheres
submerged in liquid fluidized beds, experimental
determination of interaction force on, 27
Static mixer
Helix - new type of, - operation characteristics and
comparison with mixer types, 39
Tubular flow apparatus
effects of organized structures of beds packed within,
on homogeneity of radial distribution of fluid
velocity, 141
Turbulent flows
influence of viscosity on micromixing in, 133

Mass transfer
in liquid flows during absorption, 65, 75
Interaction force
on spheres submerged in liquid fluidized beds, experimental determination of, 27
Hydrodynamic
and mass transfer phenomena in agitated gas-liquid
reactors and bubble columns at elevated pressures:
state of art, 85
Helix
new type of static mixer - operation characteristics
and comparison with mixer types, 39
Liquid
very low Reynolds number, through screen, 139
Fluid flow
at liquid, mass transfer in during absorption, 65, 75
Primes
in pipe flows, 12
Drop coalescence
in pipe flows, 15
Efficiency
of the H_2 and C_2H_4 in aqueous ethylene glycol
solutions at 25°C, 67
Interaction
of gases at high values of Schmidt number
dependence of liquid-side mass transfer coefficient
on, 75
Drop coalescence
in pipe flows, 15
Deposition
liquid, amount of, collected at low temperatures,
analysis of, 1
Characterization
of the H_2 and C_2H_4 in aqueous ethylene glycol
solutions at 25°C, 67
Micromixing
in turbulent flows: influence of viscosity on, 133
Mixed integer programming
experiments in process synthesis for, 99
Mixers
Helix - new type of static, - operation characteristics
and comparison with mixer types, 39
Common plants
two-stage reactor, design and performance of, 119
Oxidation
of α -xylene into phthalic anhydride in reactor with
two fixed beds of V-Ti catalyst, 127
Packed beds
within tubular flow apparatus: effects of organized
structures of, on homogeneity of radial distribution
of fluid velocity, 141
Type flows
drop coalescence in, 15
Porous media
characterization of, by means of Voronoi-Delaunay
tessellation, 35
Pressure optimization
of gas in beds of solids: modeling of, 47
Process synthesis
experiments in, via mixed-integer programming, 99
Programming
mixed-integer, experiments in process synthesis for,
99
Science
very low Reynolds number fluid flow through, 139
Spherulites
of the H_2 and C_2H_4 in aqueous ethylene glycol solution
at 25°C, 67
Spheres
submerged in liquid fluidized beds, experimental
determination of interaction force on, 27
Static mixer
Helix - new type of, - operation characteristics and
comparison with mixer types, 39
Tubular flow apparatus
effects of organized structures of beds packed within,
on homogeneity of radial distribution of fluid
velocity, 141
Turbulent flows
influence of viscosity on micromixing in, 133
